AIRAS Cloud

Buyer's Guide to AI Governance

What to buy, in what order, and how to judge a platform.

AIRAS Cloud Solutions · Dublin, Ireland · 2026 edition

The problem

Most organisations already run more AI than they know about. Spreadsheets and generic GRC tools cannot say which systems the EU AI Act covers, who owns them, or what evidence will satisfy an auditor.

How AIRAS solves it

1. Find every AI system, including staff-adopted tools, with Shadow AI discovery.
2. Classify each one with ARIE's deterministic, explained reasoning.
3. Give every system a named owner and a human decision.
4. Hold append-only evidence and export it on demand.

Worked example

A fictional insurer finds 212 staff using a public chat assistant, registers it, has ARIE map nine obligations, records an approve-with-controls decision by the Chief Risk Officer and exports an evidence pack — in one record.

Fictional organisation. Illustrative only — not an ARIE result or legal advice.

Five steps to your first governed decision

1 **Founder call**
30 minutes to understand your AI estate.

2 **Scoping**
Products, sources and success measures.

3 **Pilot**
A controlled pilot on your real obligations.

4 **Contract**
An Order Form for what you chose.

5 **Onboarding**
Tenants, roles, sources, first decisions.

Checklist and questions

- Does it find AI you did not register?
- Can it explain every classification?
- Does a named human own each decision?
- Is the audit history append-only?
- Can you buy one product and add more later?

Do we have to buy everything?

No. Start with one product and add more any time; the full licence includes them all.

Is Shadow AI included?

Yes, in the full licence. It is also sold on its own.

How long to start?

A founder call, scoping and a controlled pilot on your real obligations.

Book a founder call.

30 minutes. Your AI estate. A clear recommendation.
