AIRAS Cloud

Shadow AI Discovery Guide

Find unsanctioned AI and turn it into governed decisions.

AIRAS Cloud Solutions · Dublin, Ireland · 2026 edition

The problem

Staff adopt AI tools faster than policy can follow. Blocking them drives use underground; ignoring them leaves data, legal and reputational risk unmanaged.

How AIRAS solves it

1. Connect signed, metadata-only sources — prompt content is refused.
2. See which tools are used, by how many people and where.
3. Open a case per tool with an owner and deadline.
4. Let a named human approve, restrict or retire, then hand approved tools to the AI register.

Worked example

A fictional hospital group discovers a meeting note-taker used by 64 staff, drafts a policy, approves it for internal meetings and restricts an image generator — without reading a single prompt.

Fictional organisation. Illustrative only — not an ARIE result or legal advice.

Full licence or one product

Shadow AI is included in the AIRAS Cloud full licence and is also available on its own.

Five steps to your first governed decision

1 **Founder call**
30 minutes to understand your AI estate.

2 **Scoping**
Products, sources and success measures.

3 **Pilot**
A controlled pilot on your real obligations.

4 **Contract**
An Order Form for what you chose.

5 **Onboarding**
Tenants, roles, sources, first decisions.

Checklist and questions

- Metadata only, no prompt content
- Signed and replay-protected sources
- Cases with owners and deadlines
- Human decision before anything enters the register

Does it read what staff type?

No. Discovery is metadata only; prompt content is refused.

Can we buy it on its own?

Yes. It is also included in the full licence.

Who makes the decision?

Always a named person in your organisation.

Book a founder call.

30 minutes. Your AI estate. A clear recommendation.
